EDUCATION

Sukkur IBA University

Bachelor of Computer Science

CGPA: 3.31 / 4.0

Sindh, Pakistan

Sep. 2022 – May 2026

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C++, HTML/CSS

Frameworks: MERN Stack (MongoDB, Express, React, Node.js), TensorFlow, Keras, Scikit-learn

Databases: MySQL, MongoDB

Developer Tools: Git, Github, Google Colab, VS Code, PyCharm, IntelliJ, Eclipse, NetBeans, Kaggle

ML Skills: Transfer Learning, Data Augmentation, Supervised Learning, Model Deployment

Libraries: pandas, NumPy, Matplotlib

Core CS: OOP, DSA, DBMS

Soft Skills: Problem Solving, Public Speaking, Team Collaboration

EXPERIENCE

Intern – Inter-Services Public Relations (ISPR)

July 2025 – Aug 2025

- Observed and supported technology-enabled media and communication workflows within a large organizational setup
- Assisted with digital content coordination, data organization, and basic technical documentation
- Gained exposure to structured systems, operational processes, and cross-team collaboration
- Developed professional communication, analytical thinking, and adaptability in a formal work environment

PROJECTS

Quiz Flashcards App | MERN Stack

July 2025

- Built a responsive full-stack learning platform (React, Node.js, Express, MongoDB) with dynamic quizzes and flashcards across user-selected topics
- Implemented secure JWT authentication, user progress tracking, quiz reviews, and a leaderboard with persistent storage
- Developed an admin dashboard enabling full CRUD management of users, quizzes, flashcards, and topics

Skin Lesion Classifier | Deep Learning

April 2024

- Developed a CNN-based skin lesion classifier trained on the HAM10000 dermatology dataset
- Applied data augmentation, batch normalization, and dropout to enhance model accuracy and reduce overfitting
- Deployed an interactive Gradio interface for real-time image uploads and automated classification

Book Store App | Java, JDBC, MySQL

November 2023

- Created a console-based bookstore management system using Java with JDBC and MySQL
- Built user and admin modules supporting registration, login, catalog browsing, cart management, and order processing
- Implemented DBMS concepts including CRUD operations, transactions, and secure role-based access control

AI Chatbot | Java, OpenAI API, MySQL

May 2022

- Developed a command-line AI chatbot using Java integrated with OpenAI's GPT API for contextual real-time responses.
- Integrated MySQL with JDBC to store, retrieve, and manage conversation history
- Added input validation, error handling, and dialog flow logic to ensure engaging and consistent user interaction
