PROFESSIONAL SUMMARY

MERN stack developer experienced in building scalable full-stack web applications using React.js, Node.js, Express.js, and MongoDB. Developed production-ready systems with REST APIs, authentication, dashboards, and cloud deployment. Also experienced in AI-powered applications and modern backend frameworks, with a focus on clean code, performance, and practical system design.

EDUCATION

Sukkur IBA University

Bachelor of Science in Computer Science – CGPA: 3.68/4.0

Sukkur, Pakistan

Aug 2022 – June 2026

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Vite, Ant Design, Responsive Design

Backend: Node.js, Express.js, RESTful APIs, API integration and authentication (JWT, OAuth basics), Flask, FastAPI

Database: MongoDB

Tools & Platforms: Git, GitHub, Cloudinary, Vercel, Postman, npm

Deployment: Deployment using Vercel and cloud services (Cloudinary, serverless hosting)

AI/ML: TensorFlow, Keras, PyTorch, LangChain, RAG Systems, OpenAI API, Pinecone, ChromaDB

PROFESSIONAL EXPERIENCE

Junior Developer

Nov 2025 – Jan 2026

Remote Position

Remote

- Built Flask-based FCA application portal with multi-step form wizard and AI-powered pre-fill system, reducing manual input time through intelligent field prediction
- Developed PDF generation pipeline using PyMuPDF and ReportLab, automating template mapping with JSON persistence and export workflows
- Built AI chatbot platform with role-based authentication and document management features handling structured datasets
- Created bank statement processing tool with API integration and responsive UI for handling multiple uploads

Software Engineering Intern

Jun 2025 – Jul 2025

Sukkur Electric Power Company (SEPCO)

Sukkur, Pakistan

- Revamped SEPCO's official website using React.js with modern UI principles and responsive layouts
- Tested and debugged Power Smart mobile application to improve stability and usability before production release

PERSONAL PROJECTS

TaskFlow – Full-Stack Task Management System

2025

- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, JWT, Cloudinary, Ant Design
- Built a full-stack task management platform with role-based authentication, protected routes, and Admin/User dashboards
- Designed RESTful APIs for task CRUD operations, assignment, filtering, sorting, and reporting
- Implemented task priorities, statuses, progress tracking, and checklist features for workflow management
- Developed user management system allowing admins to update, delete, and monitor users
- Implemented search, filtering, and analytics dashboards with charts for task distribution and statistics
- Integrated file uploads and attachments using Multer and Cloudinary storage
- Structured backend using controllers, middleware, and Mongoose schemas for scalable architecture
- Built reusable React components, custom hooks, and context providers for state and theme management
- Implemented Excel export functionality for tasks and reports
- Deployed on Vercel – Live Demo | GitHub

Multi-Document RAG System with Hybrid Retrieval

2026

- Built hybrid retrieval pipeline using ChromaDB + BM25 with re-ranking and caching
- Delivered web interface for PDF uploads, querying, and summarization – GitHub

Smart Crop Disease Detection System

2025

- Trained CNN model on 87,000+ images achieving 94% accuracy
- Developed real-time inference web interface – GitHub
