ABOUT ME

Computer Science professional with hands-on experience in full-stack development, proficient in building scalable web applications using Node.js, Express.js, MongoDB, and React.js. Skilled in designing and deploying secure REST APIs, implementing authentication and role-based access control, and integrating responsive frontends with modern UI frameworks. Passionate about delivering efficient, user-friendly, and performance-driven solutions from backend logic to polished frontend experiences.

EDUCATION

Sukkur IBA University Sukkur | 2022-2026

Bachelor of Computer Science CGPA : 3.66/4

WORK EXPERIENCE

Sukkur Electric Power Company (SEPCO) | June - Aug 2025

Software Engineering Intern

- Revamped SEPCO's official website using React.js and modern UI/UX design principles, improving accessibility and mobile responsiveness, leading to faster load times and better user engagement.
- Performed manual testing on the Power Smart mobile application, checking functionality, navigation flow, and ensuring a smooth user experience.
- Gained practical exposure to IT infrastructure, including firewall configuration, network security protocols, and enterprise-level system administration.

SKILLS

- **Languages:** JavaScript, Python, Java, C++, HTML, CSS, Assembly
- **Web Stack:** React.js, Node.js, Express.js, MongoDB, Mongoose, Vite
- **AI/ML:** CNN, Keras, TensorFlow, Streamlit, Scikit-learn
- **Other:** MySQL, Git, REST APIs, Responsive Web Design

PROJECTS

Smart Crop Disease Detection System

- Developed a CNN-based detection system using TensorFlow, Keras, and Streamlit
- Trained on 87K+ images across 38 crop disease classes, achieving high accuracy and generalization
- Implemented real-time image upload, OpenCV preprocessing, and dynamic result display for instant predictions

TaskFlow – Full-Stack Task Management System

- Developed a full-stack application with React.js (Ant Design) frontend and Node.js, Express.js, MongoDB backend.
- Built interactive dashboards with analytics charts, dark mode, and responsive design.
- Implemented task lifecycle features (creation, updates, priority/status changes, checklists).
- Added role-based authentication (Admin/Member) with secure JWT integration.
- Integrated Cloudinary for profile image and file uploads.
- Enabled Excel export for tasks and users through backend APIs.
- Deployed application to Vercel for live usage across devices.

CERTIFICATIONS

- **Machine Learning Specialization**
DeepLearning.AI – Issued Jul 2025
Skills: Supervised & Unsupervised Learning, Neural Networks, Reinforcement Learning
- **Introduction to MongoDB**
MongoDB University – Issued May 2025
Skills: MongoDB, Mongoose ODM
