

MUHAMMAD HUZAIFA

Backend Developer | Full-Stack Engineer

+92-317-3652169 | muhammadhuzaifakashif765@gmail.com | LinkedIn | GitHub

SUMMARY

Backend Developer with strong foundations in Python, Node.js, and database design. Experienced in building RESTful APIs, implementing secure authentication systems, and working with SQL and NoSQL databases. Solid understanding of OOP principles, data structures, and HTTP protocols. Eager to learn new technologies and contribute to innovative backend solutions.

EDUCATION

Sukkur IBA University
Bachelor of Science in Computer Science

Graduation: June 2026
CGPA: 3.45

TECHNICAL SKILLS

Programming Languages: Python, JavaScript (ES6+), TypeScript, SQL
Backend Technologies: Node.js, Express.js, FastAPI, REST APIs, JWT Authentication, API Design
Databases: MongoDB, PostgreSQL (Supabase), MySQL
Core Concepts: OOP, Data Structures, HTTP Methods, Client-Server Architecture, Version Control (Git/GitHub)
Tools & Frameworks: Git, Linux (Ubuntu), Nginx, Vercel, PyTorch, TensorFlow

EXPERIENCE

Software Engineer Intern July 2025 – October 2025
Climate Forward Pakistan (CFP) Sukkur, Pakistan (Remote)

- Developed RESTful APIs using Node.js and Express.js for a community platform serving multiple users.
- Architected a Python-based web scraping framework to collect and process data from 10+ sources.
- Implemented secure authentication protocols and database security measures ensuring 100% data integrity.
- Collaborated with frontend team to integrate APIs, following HTTP best practices and proper status code handling.

PROJECTS

TaskFlow – Full-Stack Task Management System | Node.js, Express.js, MongoDB, REST APIs, JWT Dec 2025

- Built RESTful API backend with Node.js and Express.js, implementing CRUD operations for task management.
- Designed MongoDB database schema with proper indexing and relationships for optimal query performance.
- Implemented role-based authentication (Admin/Member) using JWT tokens and secure password hashing.
- Developed API endpoints for file uploads (Cloudinary integration) and Excel export functionality.
- Applied OOP principles and MVC architecture for maintainable, scalable code structure.

EcoVision: Sustainable AI Ecosystem | Next.js, PostgreSQL, MongoDB, Python, REST APIs Jan 2026

- Designed hybrid database architecture using PostgreSQL (Supabase) and MongoDB for different data types.
- Built RESTful APIs integrating Python-based AI models (ResNet-50) with Node.js backend services.
- Implemented authentication system with Clerk and payment processing with Stripe API integration.
- Optimized database queries and API response times, achieving sub-1s backend processing.

CERTIFICATIONS

HP LIFE Data Science & Analytics Certificate: Completed comprehensive training in data science practices, methodologies, and analytics tools for data-driven business approaches.

Advanced Learning Algorithms (Stanford Online - DeepLearning.AI): Specialized in advanced machine learning algorithms through Stanford and Coursera verified certification.

Introduction to MongoDB: Completed MongoDB fundamentals and database management certification.
